

Utility Billing Equal Pay Application

CUSTOMER INFORMATION		
Last Name	First Name	MI
Service Address	Account Number	
AUTHORIZATION AND SIGNATURE	Date	

I understand that I must be the recorded owner of the property and that I am required to have had an active water account on the property for a minimum of twelve months. I further understand that the average historical monthly expense will be used to determine the Equal Pay Amount. This twelve-month usage will project an average monthly bill, plus an additional five percent, which I will pay each month until the annual reconciliation.

Each year my account will be reconciled and I agree to pay Ogden City Utilities the balance I owe for the twelve month period if an underpayment exists. In the event of an overpayment, the Utility will credit my account the additional amount paid. During this reconciliation period, Ogden City will automatically review and reset my Equal Pay Amount using the most recent twelve-month history. I further understand that continued program eligibility depends on my account remaining current.

I understand that if significant increases or decreases in my overall usage patterns or rates have occurred, then my payment will be adjusted to avoid a large debit or credit balance. I further understand that the equal pay is based on my water charges alone and that any changes to other services may affect the overall total of the Utility Bill. As such, I understand that my payment amount may change before the annual reconciliation.

Lastly, I understand that my account must be paid current before I can enroll in this service and that equal pay will not start until the next billing cycle after Ogden City receives this agreement. This agreement remains in effect indefinitely until I provide a written termination notice to the Utility or Ogden City terminates my participation due to ineligibility or violation of this agreement.
